

Technology Health Check Project

Executive Summary

A holistic assessment of current technology with strategic and triage recommendations.

Background / Statement of Need:

Scope:

The goal of the Health Check assessment is to discover, document and analyze current technology used by the organization. RWA will analyze existing technology usage and configuration and compare it to industry standards and best practices for organizations of similar profiles. Our assessment will cover the following areas:

- I. **Information Technology Infrastructure**
- II. **Enterprise Applications**
- III. **Medical Devices / Clinical Systems**
- IV. **Business Operations**
- V. **Documentation & Training**

Recommendations will be made in each area above in three categories:

- I. **Immediate**
- II. **Tactical**
- III. **Strategic**

Analysis Level Deliverables:

The Health Check Assessment can be performed with the following levels of detail.

- I. **Overview Health Check**
- II. **Documented Health Check**
- III. **Strategic Analysis**
